Dear Ms. Scarlet Duggan

I am writing to you about the proposed cell tower on the Pelican Hill golf course near Cameo Highland in Corona del Mar. I am a resident living near the proposed tower and would suggest that the tower location be moved further back on the golf course. Imagine residing at the house across the street from the proposed tower, opening your front door and seeing 200 feet away a large cell tower with a generator and fuel tank. You would have a direct view of the proposed commercial site, with no vegetation to provide a visual screen. This is because of the requirement that all combustible vegetation would have to be removed down to the street for fire safety.

Thank you for your consideration.

John Stockman
