Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste. California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Date: 01-24-2015
Citation: HSC 6.95 25507 - California Health and Safety Code, Chapter 6.95, Section(s) 25507

Violation Description: Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.

Violation Notes: Returned to compliance on 07/22/2024. Your HMBP has been reviewed and has deficiencies. At a minimum the following items must be addressed. Review, complete, and resubmit HMBP. Ensure all elements are completed and are accurate. Business Owner/Operator: No names listed for "signer" & "preparer" Site Map: Requires North (N) Orientation. BEP: Section C - ER Phone #s - add 714 433-6000 for "local unified program agency". Training: A copy of an employee training attendance was submitted. You are required to submit a PLAN that incorporates the items below. The documentation of training provided should be kept onsite for review during inspections to validate that training was completed. (a) The business plan shall include a training program which is reasonable and appropriate for the size of the business and the nature of the hazardous materials handled. The training program shall take into consideration the responsibilities of the employees to be trained. The training program shall, at a minimum, [Truncated]

Eval Notes:

Walked the facility with Angel Oliva, Facility Manager. Verified ownership as PRAXAIR DISTRIBUTION INC and the number of employees as 46. The facility is a Very Small Quantity Hazardous Waste Generator that generates waste oil from equipment maintenance. Inspected the facility and discussed processes which generate hazardous waste. No hazardous waste accumulation was observed during the inspection. No hazardous materials were observed in the municipal trash. Employees were reported to be trained. Emergency response phone numbers were available near a phone. A copy of this report was sent to angel.oliva@linde.com.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-06-2020
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes:

Regional Board staff conducted a compliance inspection of the above facility on January 6, 2020. Staff met with Ms. Gabe Mendez and spoke with Mr. Ryan Bloom, LRP, via cell phone. The SWPPP and training records were reviewed. The SWPPP needs to be updated to reflect personal changes in the Pollution Prevention Team. Employee training was last conducted June 2019 and is conducted yearly. A site walk was conducted and the facility collects samples from one outfall. The facility has collected two stormwater samples this reporting year and is in Baseline for all parameters. The facility collects aluminum cans, plastics, paper, and cardboard products. Aluminum cans and plastics are baled, and the baler and baled products are stored indoors. The facility also collects unsorted metals and stores them together in a roll-off bin. No violations were observed at the time of inspection. *Full inspection report in attachments.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-11-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes:

On site for routine hazardous materials and business emergency plan inspection. Observed the facility and inspected hazardous materials storage. The following materials were observed in amounts that meet or exceed the minimum volumes required for disclosure: - Propane (6 x 7-gallon cylinders) - Hydraulic oil (1 x 55-gallon drum) - Diesel fuel (1 x 55-gallon drum) The facility is responsible for identifying all hazardous materials, and to include hazardous wastes, which are above disclosure thresholds (55 gallons of a liquid, 500 pounds of a solid, 200 cubic feet of a compressed gas). If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) within 30 days of the change. Hazardous Materials documents can be submitted via the California Environmental Reporting System (CERS) located at <http://cers.calepa.ca.gov/>. Please note: The business is required to review the CERS electronic [Truncated]

Eval Type: Other, not routine, done by local agency
Eval Notes: The purpose of this offsite reinspection is to follow up on the violation cited on a previous inspection report. The business updated and resubmitted the Site Map in CERS. The map was reviewed and ACCEPTED by this agency. Violation I632 was corrected. In addition to the Site Map, the business resubmitted the following HMBP documents via CERS: - Business Activities - Business Owner/Operator Identification - Hazardous Materials Inventory - Emergency Response Plan/Employee Training Plan. The documents were reviewed and ACCEPTED by this agency. No violations remain under the Hazardous Materials Disclosure program. Please note: The business is required to annually review all HMBP documents in CERS and resubmit between January 1st and March 1st of each year. Please ensure that the review and resubmittal of the documents are done by the deadline to avoid violations or possible late fees. Eval Notes:

INSPECTOR COMMENTS On site for routine hazardous materials and business emergency plan inspection. Consent to enter and inspect was given by Ramon Garcia, Operations Manager. Observed the facility and inspected hazardous materials storage. The following materials were observed in amounts that meet or exceed the minimum volumes required for disclosure: - Propane (116 gallons) - Argon/CO2, compressed (280 cu ft) - Diesel (55 gallons) - Hydraulic oil (55 gallons) Please make the following updates to the hazardous materials chemical disclosure for accuracy: - Add Argon/CO2 - Propane: the maximum daily amount and the largest container size (should be 8 gallons). Site map/evacuation map is present and posted. MSDS available on site. The site map does not show the correct location of the propane rack. Requested facility to correct the site map and submit to CERS. The Emergency Response Plan is on site. Employee training records were provide via email [Truncated]

with Mr. Ryan Bloom, LRP, via cell phone. The SWPPP and training records were reviewed. The SWPPP needs to be updated to reflect personal changes in the Pollution Prevention Team. Employee training was last conducted June 2019 and is conducted yearly. A site walk was conducted and the facility collects samples from one outfall. The facility has collected two stormwater samples this reporting year and is in Baseline for all parameters. The facility collects aluminum cans, plastics, paper, and cardboard products. Aluminum cans and plastics are baled, and the baler and baled products are stored indoors. The facility also collects unsorted metals and stores them together in a roll-off bin. No violations were observed at the time of inspection. *Full inspection report in attachments.

Eval Division: Water Boards

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-11-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes:

On site for routine hazardous materials and business emergency plan inspection. Observed the facility and inspected hazardous materials storage. The following materials were observed in amounts that meet or exceed the minimum volumes required for disclosure: - Propane (6 x 7-gallon cylinders) - Hydraulic oil (1 x 55-gallon drum) - Diesel fuel (1 x 55-gallon drum) The facility is responsible for identifying all hazardous materials, and to include hazardous wastes, which are above disclosure thresholds (55 gallons of a liquid, 500 pounds of a solid, 200 cubic feet of a compressed gas). If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) within 30 days of the change. Hazardous Materials documents can be submitted via the California Environmental Reporting System (CERS) located at <http://cers.calepa.ca.gov/>. Please note: The business is required to review the CERS electronic [Truncated]

Eval General Type: Other/Unknown
Eval Date: 07-20-2020
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes:

The purpose of this offsite reinspection is to follow up on the violation cited on a previous inspection report. The business updated and resubmitted the Site Map in CERS. The map was reviewed and ACCEPTED by this agency. Violation I632 was corrected. In addition to the Site Map, the business resubmitted the following HMBP documents via CERS: - Business Activities - Business Owner/Operator Identification - Hazardous Materials Inventory - Emergency Response Plan/Employee Training Plan. The documents were reviewed and ACCEPTED by this agency. No violations remain under the Hazardous Materials Disclosure program. Please note: The business is required to annually review all HMBP documents in CERS and resubmit between January 1st and March 1st of each year. Please ensure that the review and resubmittal of the documents are done by the deadline to avoid violations or possible late fees. A copy of this report will be emailed to: Gaby

APNS: 014-323-08
Description:

Site History: The Engineering Plating Corporation (Facility) was located at 1224 East Pomona Street, Santa Ana, California. The Facility has a history of plating activities over the past 30 years. Engineering Plating had operated at the Facility from 1996 to 2002. Prior to Engineering Plating, Europa Wheels occupied buildings 1222 and 1224 for plating and waste treatment operations. The shipping and receiving area of the Facility was the location of Europa Wheel's cyanide destruction unit and a clarifier discharging to the sewer. The area was also identified as the location of underground storage tanks. The tanks were removed in 1990. The Facility apparently plated zinc and cadmium over chrome conversion layer. The Facility waste stream consisted of aqueous waste with metals. On June 24, 1999, Orange County Health Care Agency (OCHCA), the designated CUPA conducted a site inspection at the Facility and collected three soil samples from different locations. The analytical results indicated that three have been releases of hazardous waste containing elevated levels of metals from the wastewater treatment system with potential for migration to the groundwater. On September 20, 1999, OCHCA conducted a joint inspection at the Facility with the Chief of Santa Ana City Fire Department. The inspection report states that the secondary containment area of the treatment unit was not sufficient and it was flooded and etched. The cracked concrete on the storage room floor in which soil sampling and further analysis had shown elevated levels of cadmium. The pavement into the outside yard was also sampled and analyzed and the data confirmed that the release was chromic acid. On February 7, 2000, the Orange County Sanitation Department conducted an inspection and reported that sludge had flowed from the process room, through a storeroom, to a front outside planter. Based on the result of the inspection conducted by Orange County Sanitation Department, on February 7, 2000, Santa Ana Regional Water Quality Control Board inspected the Facility and noted a yellow crystalline residue on the floor of the front store room and on the

S113106096

floor out of the door to a front planter. The soil analysis data from the front planter showed elevated levels of zinc. It was observed that the secondary containment for the treatment unit was flooded and sludge had accumulated on the floor of the secondary containment. On March 8, 2001, DTSC performed a Phase I Site Assessment Verification Inspection of the Facility. As a result of the inspection and the review of the available records DTSC identified several SWMUs/AOCs that will require further investigation. On April 18, 2002, DTSC issued a final Corrective Action Consent Agreement (Consent Agreement) to the Facility. Since the Facility owner who signed the Consent Agreement passed away, DTSC issued a draft Consent Agreement to the Property owner on December 11, 2002. On February 3, 2003, Tiered Permitting Corrective Action Branch coordinated and conducted a site inspection with DTSC Emergency Response Unit and Orange County Health Care Agency to verify Emergency Removal Action required at the Site and subsequently issued a letter to the property owner requesting the immediate removal and proper disposal of hazardous waste stored on site. The hazardous waste and hazardous waste constituents of concern at the Facility include, but are not limited to cadmium, chromium, copper, lead, nickel, silver, zinc, and cyanide. Based on the history of the site, poor waste management history of the Facility, the documentation of other plating and electronics manufacturing activities including the removal of underground tanks (sumps), and the lack of confirmation sampling after other occupants vacated the building, provide the rationale for site investigation. DTSC issued an Imminent and/or Substantial Endangerment Determination and Remedial Action Order (Order) to the Respondent Mr. Joe Ledesma on August 13, 2013. During Fiscal Year 2015/2016 DTSC acquired site access from the Respondent and collected soil, soil gas, groundwater, and indoor/outdoor air samples in and around the site pursuant to our Remedial Investigation work plan dated September 23, 2015 (Work Plan). During Fiscal Year 2016/2017 DTSC implemented the Work Plan which includes a next phase of Remedial Investigation, a Feasibility Study/Remedial Action Plan and a Soil Vapor Extraction Pilot Study. During Fiscal Year 2017/2018 DTSC continued with the Supplemental Remedial Investigation and the Soil Vapor Extraction Pilot Study. During Fiscal Year 2018/2019 DTSC plans to approve the Focused Feasibility Study and Remedial Action Plan and continue with the Soil Vapor Extraction Pilot Study. Also, plans to conduct GW Bench and Pilot Studies

Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Waste Oil / Motor / Hydraulic / Lubricating
EPA Region: 9
Coordinate Source: Google Map Move
Cuf Case: Not reported
Quantity Released Gallons: Not reported
Begin Date: 05/13/1992
Leak Reported Date: 09/21/1992
How Discovered: Tank Closure
How Discovered Description: Not reported
Discharge Source: Other
Discharge Cause: Unknown
Stop Method: Not reported
Stop Description: Not reported
No Further Action Date: Not reported
CA Water Watershed Name: Santa Ana River - Lower Santa Ana River - East Coastal Plain (801.11)
Dwr Groundwater Subbasin Name: Coastal Plain Of Orange County (8-001)
Disadvantaged Community: Severely Disadvantaged Community
CA Enviroscreen 3 Score: 86-90%
CA Enviroscreen 4 Score: 80-85%
Military DOD Site: No
Facility Project Subtype: Not reported
RWQCB Region: SANTA ANA RWQCB (REGION 8)
Site History: Four USTs were removed in May 1992. Water sampled in one of the tank excavations contained BTEX and 111-TCA. Two large excavations were completed and Santa Ana required no further action for soil. No MtBE data is available in the file.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste. California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violations:

Site ID: 84752
Site Name: Waste Management of Orange County
Violation Date: 10-09-2014
Citation: HSC 6.7 25292(e) - California Health and Safety Code, Chapter 6.7, Section(s) 25292(e)
Violation Description: Failure to maintain secondary containment, as evidenced by failure of secondary containment testing.
Violation Notes: Returned to compliance on 06/03/2015. Tank #7 annular tests and Tank #5 secondary piping sump testing had FAIL test results and Tank #7 piping sump testing had NOT TESTED test results reported on the report dated 6/10/2014. Repair necessary secondary containment components and retest. Submit plans to this Agency for review. Note also that at least 48 hours advance notification must be given to this Agency for inspections.

Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.

Violation Notes: Returned to compliance on 08/31/2022. The following DO inspection reports did not contain a copy of the alarm history: - 8/3/2022 - 7/7/2022 - 5/11/2022 - 4/13/2022 - 3/16/2022 - 2/16/2022 - 12/22/2021 - 11/24/2021 - 10/26/2021

Violation Source: CERS,

Site ID: 84752
Site Name: Waste Management of Orange County
Violation Date: 09-04-2015
Citation: HSC 6.7 25292.1(a) - California Health and Safety Code, Chapter 6.7, Section(s) 25292.1(a)
Violation Description: Failure to operate the UST system to prevent spills and/or overfills.
Violation Notes: Returned to compliance on 09/23/2015. The middle diesel tank spill bucket failed testing. Have the spill bucket repaired/replaced and retested and submit the results to this agency.

Violation Division: Orange County Environmental Health
Violation Program: UST
Violation Source: CERS,

Site ID: 84752
Site Name: Waste Management of Orange County
Violation Date: 09-06-2013
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Description: Failure of the overfill prevention system to meet one of the following requirements: 1. Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.
Violation Notes: Returned to compliance on 03/04/2014. The overfill method for the waste oil tank is a flapper valve in the drop tube. This is not an approved overfill method for waste oil tanks. Install and/or operate an approved overfill method (i.e., high level alarm at 90% of tank capacity). Contact this Agency if questions as to whether or not plans need to be submitted for installation of an approved overfill method.

Site ID: 84752
Site Name: Waste Management of Orange County
Violation Date: 08-21-2023
Citation: 23 CCR 16 2712(b)(1)(F) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(F)
Violation Description: "Failure to conduct secondary containment testing, or one or more of the following requirements: Perform the test of the secondary containment system upon installation, within six months of installation and every 36 months thereafter. Perform the test of a secondary containment component within 30 days of a repair or discontinuing vacuum, pressure or hydrostatic monitoring. Use a procedure that demonstrates the system works as well as at installation. Use applicable manufacturer guidelines, industry codes, engineering standard, or professional engineer approval. Performed by a certified service technician. Maintain records of secondary containment testing for 36 months."
Violation Notes: Returned to compliance on 08/21/2023. The facility failed to conduct secondary containment testing every 36 months for the T1 Diesel W Piping Sump; last secondary containment testing for the sump was conducted on 6/15/2020.
Violation Division: Orange County Environmental Health
Violation Program: UST
Violation Source: CERS,

Site ID: 84752
Site Name: Waste Management of Orange County
Violation Date: 08-20-2021
Citation: 23 CCR 16 2636(f)(4) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(4)
Violation Description: Failure to meet one or more of the following monitoring requirements in lieu of the requirement to be tightness tested every 12 months: The monitoring system maintains all product piping outside the dispenser to be fail-safe and shut down the pump when a leak is detected. The monitoring system shuts down the pump or stops flow when a leak is detected in the under dispenser containment (UDC).
Violation Notes: Returned to compliance on 08/20/2021. Liquid was observed in UDC 5/6 which caused the float mechanism to raise but the shear valve was not shut off. Corrective action: The float and chain mechanism was reset, retested and passed. The violation was corrected on site.

Violation Description: Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.

Violation Notes: Returned to compliance on 08/31/2022. The following hazardous materials were observed on site at or above disclosure quantities and have not been reported via CERS: - Propane (5 x 7-gallon cylinders) - Waste Paint (2 x 55-gallon containers)

Violation Division: Orange County Environmental Health

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-04-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for a monitor certification and routine inspection. This site has 3 double walled fuel tanks with double walled pressurized piping and 3 dispensers. All turbine sump sensors, fill sump sensors, and annular sensors alarm and shut down the turbines. The Veeder Root was tested for sensor-out and fail-safe. The dispensers use floats to activate the shut-off valves to stop flow of product to the dispensers. The tanks use flapper valves and overfill alarms. The mechanical line leak detectors were tested and passed. The spill buckets were visually tested. This site has 3 double walled oil tanks. All piping sump sensors, high level sensors, and annular sensors alarm on the Ronan monitor. The spill buckets were visually tested. The following documents are available for review: - DO statement - expiration dated 11/12/16 - DO monthly reports - Facility employee training records for 2015 - Monitor certification dated 9/5/14 - SB989 tests dated 6/10/14, 9/3/14, [Truncated]

Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS: On site for a routine hazardous waste inspection. Consent to enter and conduct inspection activities was provided by Joel Robledo, Operations Manager. Business ownership information was verified. The current number of employees is 130. Walked throughout the facility. Observed hazardous waste storage areas. Facility hadn't recent hazardous waste pick up, no waste on site to observed. Manifests were available and reviewed. Employees are reported to be trained. Emergency plan is posted throughout facility. A perimeter walk was conducted, no evidence of illegal dumping was noted.

Eval Type: Other, not routine, done by local agency

Eval Notes: I was on site today to witness a final inspection for our Agency s
plan #SR0122907. I inspected the waste oil UST system with man-hole
covers off and observed that a new cable from the waste oil UST for
the existing sump sensor and the new Hi Level sensor (Ronan Tank Leak
Sensor model LS-3) was installed. Each sensor was placed in water to
simulate a leak, and each activated an audible and visual alarm on the
Ronan monitoring system panel. The location of mounting the Hi Level
sensor at 90% was determined by using a tank chart tape measure.
Violation #TO06 is now corrected. Also, a new annular sensor for the
middle oil tank was installed and tested to simulate a leak, and an
audible and visual alarm was activated. This sensor was installed, as
the previous sensor was disconnected from electrical wiring when
removal of the sensor during the annual monitoring system
certification was attempted. Violation #TO04 is now corrected. The
Ronan monitoring system panel was [Truncated]

Eval Type: Other, not routine, done by local agency
Eval Notes: I received secondary containment test results dated 6/10/2014, 9/11/2014 and 11/24/2014. I noticed that SB989 test results dated 6/10/2014 show the annular test failed for Tank 7, but the report he submitted 11/24/2014 show the only tank that had an annular failure was Tank 5. I called Dennis Rock Construction at 714.776-1581 and spoke to Dana Rock. He explained that the original report was incorrect and that the most recent report is correct. I then asked about the Tank 5 annular re-test on 9/11/2014 with PASS results, and he explained that he tested it then. I told him that our agency was not notified to be there and that we must be notified for re-tests after failures. He said that he would schedule a re-test and notify our agency in advance this time.

(Hydraulic Oil) piping/fill sump. Both sumps were tested having water above highest penetrations and two 15-minute static water tests were performed on each using an INCON sump tester; all results were PASS. Today I was onsite and witnessed -10 inches of vacuum held on the Tank #5 oil tank annular space for 60 minutes without a change in vacuum. Dana Rock of Dennis Rock and Associates conducted the testing.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-31-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes:

On site to witness monitoring system certification testing activities and to conduct routine UST inspection. Diesel Tanks: All annular and sump sensors alarmed properly (visual and audible) and shut down respective turbine when submerged in water. UDCs have Bravo boxes with float and chain mechanism. Water was poured in all UDCs and all float and chains functioned properly except UDC 5/6. Float in UDC 5/6 was replaced during the inspection and passed when retested. Fail-safe, sensor out and emergency shut off were tested and passed. Spill buckets were tested visually without any changes in water level. Line leak detectors will be tested on 9/1/17. New and waste oil tanks: All annular sensors alarmed properly, both visual and audible, at sensor out. All sump sensors alarmed properly (visual and audible) when submerged in water. Site has flappers for overfill prevention for all tanks. Spill buckets were tested visually without any changes in [Truncated]

Eval Notes:

Mechanical inspection with Joel Robledo, of the underground tank system & records. Verified the facility has 6 double walled USTs. 3 Double walled Steel tanks contain diesel with pressurized double walled piping mechanical leak detectors, with shallow dispenser pans (Bravo Boxes). The fueling system is monitored by a VeederRoot TLS which is programmed for both positive shutdown and failsafe. Overfill utilizes both high level alarm and flappers. 2 Double walled fiberglass tanks contain new oil (motor and hydraulic) suction double walled fiberglass piping with no dispensers. 1 Double walled fiberglass tank contains used oil and no piping. The three double walled fiberglass tanks are monitored by a Ronan X76. Overfill utilizes high level alarm. All spill buckets hydrostatically tested. Verified all systems operational. All systems PASS Corrected CERS UST submission which was Accepted. copy to: jrobledo@wm.com

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Quarterly Update:	Updated 11/02/07: EECO was a manufacturer of electronic components such as electronic switches, video editing equipment, mini computers, and printed circuit boards. It received an Interim Status Document (ISD) for management of hazardous waste in 1981. The regulated units were a drum storage warehouse, a concrete storage pad containing drums and a storage tank, an underground wastewater neutralization system, an aboveground wastewater neutralization system, and an underground storage tank. The site was sold to the Santa Ana school district in 1989. The site occupies approximately 10 acres. Closure activities conducted in 1995 identified VOCs that were detected in soil gas and/or groundwater at the site. The origin of the VOC release was a non-regulated outside storage area. Groundwater monitoring wells were installed according to a workplan completed in February 1996. Soil containing copper above the cleanup level was excavated from the Site between 1993 and 1996. RCRA closure certification for the regulated units was accepted by DTSC in a letter dated May 6, 1996. DTSC made its acceptance of the closure certification contingent upon implementation of the groundwater monitoring workplan activities. Beginning in July 1998, an intermediate school (grades 6, 7, 8) was constructed on the Site. A Corrective Action Consent Agreement was signed on January 23, 2004. DTSC accepted the results of a risk analysis of soil vapor and indoor air in March 2006. An RFI Workplan was approved on May 17, 2006. Pesticide sampling was conducted in 2006, and DTSC accepted the results of the risk analysis of the pesticide sampling in December 2006. Additional groundwater monitoring has been conducted from 2006 to 2007. DTSC met with the facility consultant on November 27, 2007 to discuss the most recent sampling results and determine the next course of action. Updated 8/13/08: During the November 2007 meeting, DTSC recommended that the facility begin preparation of a Corrective Measures Study (CMS). Final approval of the CMS is expected by December 2008. All previous risk assessments have shown no potential risk to the students or teachers at the school occupying the site. Updated 6/25/09: The facility submitted a draft CMS Workplan on April 27, 2009. DTSC sent comments on the workplan on June 2, 2009, requesting a response within 20 days of the date of receipt of the letter. Updated 11/12/09: The facility submitted a final Corrective Measures Study on November 4, 2009.

Violation Date: 04-11-2024
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 04/18/2024. The following hazardous wastes have been accumulated over 180 days: - (2) 55-gallon drum of used oil filters

Violation Description: 6.95, Section(s) 25505(a)(4)
Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.

Violation Notes: Returned to compliance on 04/15/2024. Annual employee training has not been conducted for all applicable employees. Previous training records were not available for review.

Violation Division: Orange County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 365657
Site Name: SANTA ANA UNIFIED SCHOOL DISTRICT OFFICE
Violation Date: 05-26-2020
Citation: HSC 6.5 25160.2 - California Health and Safety Code, Chapter 6.5, Section(s) 25160.2

Violation Description: Failure of a generator of hazardous waste that meets the conditions to be transported on a consolidated manifest to comply with one or more of the required consolidated manifesting procedures and retain copies of receipts for three years.

Violation Notes: Returned to compliance on 02/03/2022. The facility could not provide copies of the consolidated hazardous waste manifests for the removal of waste oil, waste antifreeze or waste metal filters generated at the facility. Corrective action: Within 30 days, provide to this Agency documentation of the consolidated hazardous waste manifests for the wastes mentioned above generated at the facility from the previous three years.

SAUSD District Office 1601 E. Chestnut Ave. Santa Ana, CA 92701 On site for a routine hazardous waste inspection. Met with Camille Boden, Executive Director, Risk Management who granted consent to inspect and to take photos if needed. The District Yard, Building Services and Printing operations moved from this location to 720 N Fairview St, Santa Ana, CA 92703. Automotive maintenance remains at this location. Conducted a walk-thru and perimeter inspection of the facility including an observation of the trash dumpster. Observed that they have waste containers (1-55 gal waste antifreeze, 3-55 gal waste oil and 1-55 gal. used oil filters) which are not properly labeled or stored closed. Properly label and close these waste containers and notify me for a follow up inspection within the next 30 days. The waste disposal milk-run manifests could not be located at this time. Please have them available for my review within the next 2 weeks.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database

THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Quarterly Update: Updated 10/11/07. Embee Incorporated is a metals plating facility that operates a wastewater treatment system under Permit by Rule. Since 1993, the facility has been authorized to operate three PBR units (two pretreatment units and a sludge dryer) for treating metals and acid-containing waste using chemical and precipitation processes. In 1997, DTSC issued a Consent Order to the facility authorizing the on-site treatment of aqueous cyanide hazardous waste. In 2001, DTSC issued to the facility a Corrective Action Consent Agreement. Under the Consent Agreement, the facility has undergone facility investigation, and is currently performing a pilot study to address impacted shallow soil and groundwater near the plating building. Constituents detected in shallow soil and groundwater beneath the site include, but are not limited to: hexavalent chromium, chromium, cadmium, copper, nickel, chlorinated volatile organic compounds, and perchlorate. A report summarizing the results of the Pilot Study was submitted on 11/30/06 and is being reviewed by DTSC staff. On July

17, 2008 DTSC met with the facility to discuss interim measures to prevent further offsite migration of contaminated groundwater, overall site cleanup objectives and the results of the Pilot Study. As a result of this meeting the facility submitted their conceptual plan for overall site cleanup to DTSC on July 29, 2008. 04/11/2018 - This facility is being administrative closed due to never being regulated as a TDSF; rather, it is a Tiered Permit. See

Facility Size:	Not reported
Facility Status:	CLOSED
Activity Type:	Closure Administrative
Final Date:	Not reported
Type:	RCRA
Title Description:	Closure of Tiered Permit Facility
Due Date:	Not reported
Comments:	04/11/2018 - This facility is being administrative closed due to never being regulated as a TDSF; rather, it is a Tiered Permit. See "Facility Info Form" dated 09/17/1997, which includes information regarding the basis for this facility not needing a Federal Permit. Furthermore, the Consent Order dated 12/23/1997 states that the facility submitted a notification under Permit by Rule (PBR). This facility shows up as applicable in the California Environmental Reporting System.

Eval Notes:	INSPECTOR COMMENTS: On site for follow-up hazardous waste inspection, consent to enter and conduct inspection activities was provided by Rey Santos, Environmental Manager. Walked through building with chrome plating lines and observed the trench. Trench has been cleared of debris and standing liquid, violation I333 has been corrected. After review by this agency, trench in chrome plating building is a wet processing floor and must adhere to wet processing floor standards. Trench is sloped towards a collection sump; on this date trench was observed to have pitting, cracks and breaks in concrete. Trench should be cleared of standing liquid at least daily due to low points in trench that will prevent the flow of liquid to collection sump. Failure to follow wet processing floor standards will result in the trench being regulated as a hazardous waste tank and trench will be subject to Article 10, Tank Management Standards.

Eval Notes: INSPECTOR COMMENT: On site for a routine RCRA Large Quantity Generator
hazardous waste inspection, accompanied by Terry Carrier, Supervising
Hazardous Waste Specialist. Consent to enter and inspect was given by
Rey Santos, Environmental Health & Safety Manager. Facility is a RCRA
Large Quantity Hazardous Waste Generator. This facility consists of
several buildings on a contiguous property. The inspection included a
walk of the production area, hazardous waste generation areas,
perimeter check, hazardous waste storage area, and trash storage
areas. The process floors are sectioned by chemicals, and flow to the
low point sumps. The sumps are inspected daily, and pumped daily if
needed, per Mr. Santos. Additionally, every rinse tank get drained
into the treatment system once a week. All hazardous waste containers
and tanks had accumulation start dates within the last 90 days. The
HVOF stripping waste container and filter cake waste container, stored
in the area, [Truncated]

Eval Notes: INSPECTOR COMMENTS: On site for routine Tiered Permit, Permit by Rule (TP-PBR) inspection with Susan Berg of Orange County Environmental Health (OCEH). Consent to enter and conduct inspection activities was provided by Rey Santos, Environmental Manager. The facility conducts treatment of rinses, drag out and other wastes with chrome, cyanide and other metals. There are two PBR units: one for cyanide treatment and the other for chrome and all other metals treatment. Walked throughout facility and observed the treatment area. The following was observed: -Name of the new facility owner is not on the outside of the treatment units -Two of three cyanide process lines are missing counter current rinsing The waste analysis plan and records were reviewed and determined to be in adequate. The following documents were available and reviewed: -Written inspection schedule and log for hazardous waste tank systems -Sewer agency discharge records -Written Operating [Truncated]

Eval Notes:

On site to conduct a routine conditionally exempt (CE) tiered permitting (TP) inspection. Consent to inspect the facility was granted by Rey Santos. Also present were Ramon Gutierrez (Embee) and Susan Berg and Vicky Lee of OC CUPA. The facility has the following treatment systems: - PBR x 2 (PR0092458, see PBR report on this date) - CESW x 1 CE Unit 1 is for treatment of containers <110 gallons. Process includes container rinsing and shredding. Rinsate is transferred to batch treatment systems

Eval Division: Orange County Environmental Health
Eval Program: CE
Eval Source: CERS,

Eval General Type: Other/Unknown
Eval Date: 03-25-2016
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes:

Inspector Comments: Please be advised that this Agency has reviewed the Tiered Permitting Financial Assurance Self Certification for this facility. The 2016 Closure Cost Estimate (CCE) was not properly calculated since the incorrect 2015 inflation factor (1.014557899) that was not accepted when submitted in 2015, was used. The inflation factor for 2015, 1.106, was provided in this agency's letter which was mailed to your company in January 2015. The 2014 CCE was approved at \$26,864.09. The approved 2015 CCE was \$26,864.09 x 1.016 (inflation factor) = \$27,293.92 - salvage value. Therefore, the 2016 CCE is \$27,293.92 x 1.009 (2016 inflation factor) = \$27,539.57 salvage value. Corrected Certification Of Financial Assurance Form and Estimated Closure Cost form must be submitted by 4/8/16.

Eval Notes: INSPECTOR COMMENTS: On site for follow-up Tiered Permit inspection, consent to enter and conduct inspection activities was provided by Rey Santos, Environmental Manager. Observed process areas. Facility has installed drainboards between all cyanide tanks and cyanide rinse tanks. Observed two cyanide rinse tanks on both the LHE Cadmium Tank and Bright Cadmium Tank. Per Mr. Santos rinse tank one is placed into the batch treatment when rinse can no longer be used. Rinse from rinse tank two is then placed into rinse tank one and tank two is refilled. Further review by this agency needed. A re-inspection may be conducted to verify compliance with outstanding violations. Please note: Second or subsequent re-inspections will be conducted at a rate of \$112 per hour. Please refer to HCA Environmental Health Division, Hazardous Materials Management Program Fee Schedule at www.occupainfo.com for more information.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	D002
Waste Description:	Corrosive Waste
Waste Code:	D003
Waste Description:	Reactive Waste
Waste Code:	D004
Waste Description:	Arsenic
Waste Code:	D005
Waste Description:	Barium
Waste Code:	D006
Waste Description:	Cadmium
Waste Code:	D007
Waste Description:	Chromium
Waste Code:	D008
Waste Description:	Lead
Waste Code:	D009
Waste Description:	Mercury
Waste Code:	D011
Waste Description:	Silver
Waste Code:	D035
Waste Description:	Methyl Ethyl Ketone
Waste Code:	D039
Waste Description:	Tetrachloroethylene
Waste Code:	D040
Waste Description:	Trichloroethylene
Waste Code:	F001
Waste Description:	The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F003
Waste Description:	The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent

Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code:

F005

Waste Description:

The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code:

F006

Waste Description:

Wastewater Treatment Sludges From Electroplating Operations, Except From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis) On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.

Waste Code:

F007

Waste Description:

Spent Cyanide Plating Bath Solutions From Electroplating Operations.

Waste Code:

F008

Waste Description:

Plating Bath Residues From The Bottom Of Plating Baths From Electroplating Operations In Which Cyanides Are Used In The Process.

Waste Code:

F009

Waste Description:

Spent Stripping And Cleaning Bath Solutions From Electroplating Operations In Which Cyanides Are Used In The Process.

Waste Code:

F019

Waste Description:

Wastewater Treatment Sludges From The Chemical Conversion Coating Of Aluminum, Except From Zirconium Phosphating In Aluminum Can Washing When Such Phosphating Is An Exclusive Conversion Coating Process.

Waste Code:

P030

Waste Description:

Cyanides (Soluble Cyanide Salts), Not Otherwise Specified

Waste Code:

P098

Waste Description:

Potassium Cyanide (Or) Potassium Cyanide K(Cn)

Waste Code:

P106

Waste Description:

Sodium Cyanide (Or) Sodium Cyanide Na(Cn)

WDS:

Name: EMBEE INC
Address: 2136-2158 S HATHAWAY
City: SANTA ANA
Facility ID: Santa Ana River 30I015319
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.

Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board

Subregion: 8
Facility Telephone: 7145469842

Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: Not reported
POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 08/28/2023
Comments: Monitoring required by Water Board Waste Discharge Requirements Program for groundwater injection program performed per Interim Measures Workplan. Only nitrate as nitrogen exceeded discharge limitations, in 8 wells. Concentrations similar to nearby OCWD monitoring wells, indicating a regional issue. Concludes that in general, injections working as designed and not creating negative effects. DTSC has no comments requiring revision of the report.

Completed Area Name: PROJECT WIDE

SO CAL GAS/SANTA ANA (MINNIE ST) MGP
NEC OF MINNIE AND E WALNUT STREETS
SANTA ANA, CA 92709
Site 2 of 2 in cluster BD

EDR MGP 1008407772
N/A

Relative:
Higher

EDR MGP:

Actual:
126 ft.

The site is on 1.50 acres located in the City of Santa Ana. It is currently occupied by a plastic related business. The majority of the site is paved and no evidence of any MGP related odors or visible residues remain. The Santa Ana I site was inspected by DTSC staff on March 22, 1994. The site is currently occupied by a lumber company. The PEA Report dated December 1, 1993 (analytical) shows high levels of polyaromatic hydrocarbons and poly- nuclear aromatics, lead, and total petroleum hydrocarbons. The PEA recommended no emergency removal be conducted because of limited exposure to the substances at the site. Additional investigation, however is recommended for the Site around the former concrete oil tank area. DTSC recommends that a loww permeability fill be added to the planter boxes that have high levels of lead. The RWQCB may be concerned with the elevated levels of total petroleum hydrocarbons.

Quarterly Update: Updated 3/18/08. The former Holchem, Inc./Service Chemical Company (SCC) Facility (Site) is located approximately 28 miles south of central Los Angeles in an area within the Santa Ana city limits zoned for light industrial use. It is a small site of about 120 by 200 feet and approximately 0.5 acres in area. Historically, Holchem provided solvent recycling and chemical disposal services. Holchem accepted drums containing hazardous waste for the purposes of recycling or transfer to another treatment, storage and disposal (TSD) facility. Wastes in drums arriving at Holchem that were determined suitable for

recycling were transferred into a pretreatment tank and passed into the appropriate distillation unit for recycling. Upon completion of the recycling process, the recycled solvents were placed into new drums for resale. The non recyclable liquid waste was stored in drums until a sufficient quantity was collected so the waste can be economically shipped to another recycling treatment facility. An off-site facility would either further recycle or blend the waste with flammable waste to raise the British Thermal Unit content. This blend was then disposed of as a supplemental fuel for a cement kiln. Typical waste stream generating processes included dry cleaning, metal parts degreasing, paint and coating manufacturing, adhesives production, and compounding/formulation. Typical chemical components of waste streams accepted by Holchem include: 1,1,1-trichloroethane (TCA), trichloroethylene, (TCE) perchloroethylene, (PCE), methylene chloride, flammable solvents and trace metals. Interim Status as a TSD facility for hazardous waste was initially granted to Holchem in 1981 by the California Department of Health Services (DHS). Holchem submitted a revised Part B operations plan to the DHS in August 1989. On November 29, 1990, a final Hazardous Waste Permit was issued to Holchem (dba SCC) as operator and Mr. Lendzion as owner by the DHS for operation of the facility. As part of the DHS operation permit requirements, performance of a corrective action study of the site was required. Holchem stopped operations at the facility on June 7, 1991 and a filed a notice with the former DHS [now the Department of Toxic Substances Control (DTSC)] to obtain closure of operations on March 30, 1992. The DTSC denied closure on May 12, 1992 due to the existence of soil contamination beneath the site. Corrective action activities at the site were required by the Resource Conservation and Recovery Act (RCRA) and the Hazardous Waste Permit issued November 29, 1990 to evaluate the nature and extent of releases of hazardous waste constituents, evaluate facility characteristics, identify actual or potential receptors and to identify, develop and implement the appropriate corrective measure adequate to protect human health and the environment. A RCRA facility assessment (RFA) was conducted in 1990. Based on the findings of the RFA, a RCRA facility investigation (RFI) was conducted in November 1992 to help evaluate the source and extent of the releases of hazardous waste and hazardous constituents in both soils and groundwater and to help characterize the nature of subsurface conditions at the site. A Corrective Measures Study (CMS) Work Plan (1993) for vadose zone soils was submitted in October 1993. During the months between November 1993 and March 1994 additional field studies and remedial pilot testing activities were performed and were summarized in the draft CMS report. In addition a site-specific health risk assessment (HRA) was conducted in 1994. A draft CMS was issued to the DTSC in May 1994. Agency comments (Department of Toxic Substances Control and Regional Water Quality Control Board) were received in July 1994 with a suggestion that the CMS recommended technology may be more aptly suited as in Interim Corrective Measures (ICM). An ICM work plan was completed to describe, evaluate and present plans for an ICM to address on-site so

UNIVERSAL CIRCUITS, INC. (Continued)

S102519505

Completed Date: 06/15/1993
Comments: Region 4 staff screened a certified letter dated 4/6/93 not- fying the Department of the presence of abandoned solid and hazardous waste pursuant to 42 U.S.C. Sec. 6972 (a) et seq (RCRA). The intent of Mr Niles Gates to commence a citizens suit alleges that Universal Circuits, General Automation, Helix Circuits, LIKA & Tandy Corporations caused the soil, subsoil, and groundwater to be contaminated with: heavy metals, halogenate volatile organic compounds, (VOCs) incl- uding 1,1- Dichloroethylene (1,1-DCE), 1,2-Dichloroethane (1,2-DCA), 1,1,1-TCA, TCE, and PCE.

City: SANTA ANA
Facility ID: Santa Ana River 30I004901
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion: 8
Facility Telephone: Not reported

POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/26/2025	Source: EPA
Date Data Arrived at EDR: 07/01/2025	Telephone: N/A

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Next Scheduled EDR Contact: 01/19/2026
Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 06/26/2025	Source: EPA
Date Data Arrived at EDR: 07/01/2025	Telephone: 800-424-9346

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/02/2025	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/04/2025	Telephone: (415) 495-8895

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/02/2025	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/04/2025	Telephone: (415) 495-8895
Date Made Active in Reports: 06/16/2025	Last EDR Contact: 10/01/2025

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 06/02/2025	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/04/2025	Telephone: (415) 495-8895

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/02/2025	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/04/2025	Telephone: (415) 495-8895

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 03/11/2025	Source: Department of the Navy
Date Data Arrived at EDR: 04/02/2025	Telephone: 843-820-7326
Date Made Active in Reports: 06/24/2025	Last EDR Contact: 07/29/2025
Number of Days to Update: 83	Next Scheduled EDR Contact: 11/17/2025
	Data Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 05/19/2025	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/20/2025	Telephone: 703-603-0695
Date Made Active in Reports: 07/29/2025	Last EDR Contact: 10/01/2025
Number of Days to Update: 70	Next Scheduled EDR Contact: 12/02/2024
	Data Release Frequency: Varies

US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 05/19/2025	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/20/2025	Telephone: 703-603-0695

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

	Data Release Frequency: Quarterly

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.
